

## PJ.05.02 EXE.2.2 Multiple Remote Tower

### COOPANS Multiple Remote Tower trials OPEN DAY at Sturup airport

Thursday 15/3 2018

Welcome to Malmö Sturup airport and LFV validation platform where our Multiple Remote Tower trials take place during February and March.

The exercise performed by COOPANS, in cooperation with NLR and NATMIG, is named PJ.05.02-EXE.2.2-V2. Focus of the exercise is to further develop the Multiple Remote Tower concept for Remote Tower Centres up to V2 maturity level. This exercise in specific will handle 2 simultaneous aerodromes with up to 20 movements per hour in total.

There will be 2 parts of the exercise developing the concept to V2. The first part consists of shorter runs looking at different operational aspects while the second part contains further development of tools and features for the ATCOs.

We invite you to our open day to give you a chance to see this next step in development of the Multiple Remote Tower concept.

#### Schedule:

- |                 |   |
